Lima Pulu Kota, Sumatera Barat

Summary

Informatics graduate with hands-on experience in web development and data-driven applications. Proficient in JavaScript (React) for building responsive user interfaces and integrating APIs to support dynamic web functionality. Experienced in translating UI/UX designs into functional web components and collaborating within teams to deliver scalable and user-friendly applications. Strong analytical thinking and problem-solving skills with the ability to adapt quickly in a fast-paced development environment.

Education

Universitas Pembangunan Nasional Veteran Yogyakarta

2021-2025

- Bachelor, Informatics - GPA 3.52
- Thesis : Implementation of the You Only Look Once (YOLOv8) Algorithm and Peter Norvig's Spelling Correction for Translating Handwritten Braille

Experience

Codveda Technologies

January - February 2026

Data Analysis Intern

- Performed end to end data analysis on diverse datasets, including data cleaning, preprocessing, exploratory data analysis (EDA), and statistical modeling using Python.
- Applied various analytical techniques such as regression, time series analysis, clustering (K-Means), and classification models to extract insights and support data driven decision making.
- Developed interactive dashboards using Power BI to visualize large and complex datasets, enabling clearer insights and improving data interpretation for end users.

Bangkit Academy By Google, Goto, Traveloka

February - June 2024

Cloud Computing Intern

- Contributed to deploying applications to the cloud by developing backend systems, including creating and managing API endpoints to support system communication.
- Set up and configured cloud infrastructure, including provisioning Virtual Machines (VM), managing services, and designing and implementing databases.
- Managed end-to-end system integration to ensure applications run reliably, securely, and are scalable within the cloud environment.
- Successfully optimized cloud resource utilization, reducing operational costs by approximately $\pm 60\%$ through efficient architecture and service management.

Organization

Information Technology Club (ITC)

2022 - 2023

FrontEnd Web Developer

- Led the frontend team in developing a responsive organizational homepage using React and Tailwind CSS, delivering a modern and user friendly web interface.
- Translated UI/UX designs into functional web components with responsive design principles to ensure crossdevice compatibility.
- Coordinated cross functional collaboration to support smooth development processes and maintain overall project progress.

Skills & Competencies

Core Skills - Web Development, API Integration, Data Analysis, Analytical Thinking, Problem Solving, Team Collaboration, Project Coordination, Communication, Adaptability

Tools & Technologies - JavaScript (React), Python, SQL, R (Basic), Power BI, Microsoft Excel, Git, HTML, CSS
