Summary

Informatics fresh graduate with a strong foundation in data analysis. Proficient in SQL and Python for data cleaning, analysis, and reporting. Experienced in building dashboards and performing analytical insights to support data-driven decision-making. Strong communication skills with the ability to translate technical findings into clear and actionable insights.

Education

Universitas Pembangunan Nasional Veteran Yogyakarta - Indonesia

2021-2025

- Bachelor, Informatics - GPA 3.52
- Thesis : Implementation of the You Only Look Once (YOLOv8) Algorithm and Peter Norvig's Spelling Correction for Translating Handwritten Braille

Experience

Codveda Technologies - India

January 2026 - Present

Data Analysis Intern

- Conducted Exploratory Data Analysis (EDA) to identify trends, patterns, and actionable insights from structured datasets.
- Analyzed data using Python (Pandas, NumPy) to support data-driven decision making.
- Developed data visualizations and dashboards using Power BI to communicate insights clearly to stakeholders.
- Prepared analytical reports and insights aligned with business and project objectives.

Bangkit Academy By Google, Goto, Traveloka - Jakarta, Indonesia

February - June 2024

Cloud Computing Intern

- Developed analytical and system based thinking through intensive cloud computing training, contributing to a final project that integrated an Android application with a cloud-hosted machine learning model to support structured data processing and performance monitoring.
- Designed and implemented a secure system integration between an Android application and cloud-based services, including user authentication, supporting data integrity, access control, and operational risk mitigation.
- Optimized cloud architecture to improve system performance, reliability, and scalability, while considering efficiency, monitoring, and control aspects relevant to production environments.

Skills

- Data Analysis & Information Processing
- Python (Machine Learning & Data Processing), SQL, R (Basic)
- Microsoft Excel (Data Analysis & Reporting)
- Data Visualization (Power BI)
- Analytical Thinking, Problem Solving & Team Collaboration

Certificate

Junior Web Programmer - Pengembangan Website Web Development

Badan Nasional Sertifikasi Profesi | Issued 30 January 2024 – Expires 30 January 2027
