SUMMARY

Informatics graduate specializing in frontend development with hands-on experience building responsive web interfaces using React and Angular. Proven track record in translating UI/UX designs into maintainable components and deploying cloud-based applications.

EDUCATION

Universitas Pembangunan Nasional Veteran Yogyakarta

Bachelor of Informatics | 2021 – 2025 | GPA: 3.52 / 4.00

EXPERIENCE

Codveda Technologies | Data Analysis Intern | Jan - Feb 2026

- Performed data extraction, cleaning, and transformation using SQL and Python to prepare datasets for analysis and reporting.
- Designed and managed relational databases using MySQL, ensuring data integrity through normalization and structured schema design.
- Developed interactive Power BI dashboards by connecting to relational databases, enabling stakeholders to monitor key business metrics and make data-driven decisions.

Bangkit Academy by Google, GoTo, Traveloka | Cloud Computing Cohort | Feb 2024 – Jun 2024

- Completed the Cloud Computing learning path covering Google Cloud Platform services, cloud architecture, networking, databases, and application deployment.
- Collaborated with multidisciplinary teams to develop the BEYOND capstone project, contributing to backend service development and cloud deployment.
- Configured cloud infrastructure including Compute Engine, Cloud Storage, IAM, and database services to support application deployment.
- Applied cloud computing best practices for scalability, security, and resource management throughout the project lifecycle.

PROJECTS

Event Ticketing System | Personal Project | 2026 | [Live Demo](#)

- Designed and developed a full-stack event ticketing platform supporting Admin, Organizer, and User roles with role-based access control.
- Developed RESTful APIs for user management, event creation, ticket management, booking, organizer registration, and event approval workflows.
- Designed a normalized PostgreSQL database to manage users, organizers, events, tickets, bookings, and payments.
- Implemented route guards, HTTP interceptors, and token-based authentication to secure frontend navigation.

Handwritten Braille Translation (YOLOv8) | Final Thesis | 2025 | [GitHub](#)

- Trained and optimized a YOLOv8 model to detect and classify 28 Braille character classes from image inputs.
- Built a computer vision pipeline using Python and YOLOv8 to translate handwritten Braille, achieving 98,1% detection accuracy (mAP).
- Integrated Peter Norvig's spelling correction algorithms to refine text extraction quality, improving readability by 90,5%.

ORGANIZATION

Information Technology Club (ITC) | Frontend Web Developer | 2022 – 2023

- Developed responsive web interfaces using React and Tailwind CSS for organizational web projects.
- Translated UI/UX designs into reusable and maintainable frontend components.
- Coordinated development tasks and collaborated with team members to support project delivery.
- Ensured responsive layouts across multiple screen sizes and devices.

SKILLS

Frontend Development: React.js, Angular 20, Tailwind, HTML, CSS, TypeScript

Programming Languages: JavaScript, Python, SQL, Java

Cloud & Tools: Google Cloud Platform (GCP), Git, REST API, Postman
